

Netatmo rolls out its Thermostat for Smartphone across Europe

The Netatmo Thermostat for Smartphone is now available in 7 European countries through a multi-channel distribution network and industry partnerships. The Thermostat also reveals new features.

Netatmo, an innovation company developing consumer electronics for a better and connected lifestyle, expands the distribution of its Thermostat for Smartphone. After France and Belgium, the Thermostat is now available in 1350 points of sale across the United Kingdom, Germany, the Netherlands, Spain and Italy.

The Netatmo Thermostat is now available through various distribution channels ranging from major retailers for customers keen to install the Thermostat themselves, to professional distributors for customers preferring to have it installed.

Netatmo also announces key partnerships with energy companies for the distribution and installation of its Thermostat in Europe: CHAM, EDF group, in France; Luminus in Belgium. The partnership brings availability of the Netatmo Thermostat to all customers of the utility companies. They will be able to use the Thermostat to reduce energy bills and improve comfort within their homes.

“By building partnerships with all the stakeholders of the heating industry – major retailers, installation and maintenance professionals, manufacturers and leading energy providers – Netatmo demonstrates it is an essential partner to address the issues related to energy, a major society concern” says Fred Potter, CEO and founder of Netatmo. “Consumers want smart and practical solutions. Our Thermostat combines design, simplicity, ecology and technology. It perfectly answers this demand” he adds.

Designed by Philippe Starck, The Netatmo Thermostat was specifically created for the European market. It allows users to control their heating from their smartphone, tablet or PC. It sets a programme to reflect the users' habits. For optimal comfort, it predicts the start of the heating periods depending on the household insulation and the outside temperature. The users benefit from the right temperature at the right time.

New functionalities, for increased savings and comfort

- **The ESR : Energy Savings Report**

Netatmo equips the Thermostat for Smartphone with new tools to analyse and monitor energy consumption. From this autumn, users of the Netatmo Thermostat will receive each month the ESR, a detailed report including personalised recommendations to optimise their heating for the following month.

- **The Auto-Adapt® function**

netatmo

The Auto-Adapt® function daily analyses the home insulation and the outdoor temperature. It allows to automatically determine the required time to reach the planned temperature. It offers an optimal comfort at the right time and avoids energy over-consumption.

Widely compatible

Already compatible with gas, fuel and wood installations, the Netatmo Thermostat is now compatible with heating pumps.

The online Netatmo tool <http://check.netatmo.com> allows users to verify the compatibility of their heating installation. It already counts more than 100 brands and more than 1000 boilers and heating pumps with which the Netatmo Thermostat is compatible.

The Thermostat App is available on the App Store, Google Play Store, Windows Phone Store, Mac and PC.

Price and availabilities

The Thermostat is available at the recommended retail price of £149.

About Netatmo

Created in 2011, Netatmo is an innovation company developing consumer electronics for a better and connected lifestyle. Netatmo carefully designs their products' mechanics, electronics and embedded software. Netatmo industrializes them with the finest quality standards and designs the mobile and web applications that unleash their full capabilities.

The first device launched by the company, the Netatmo Weather Station, allows one to measure indoor air quality, weather and more. In November 2013, Netatmo launched their second product, a Thermostat for smartphones designed by Philippe Starck. At the 2014 CES, Netatmo unveiled JUNE, the first bracelet that measures sun exposure and provides recommendations to women on how to protect their skin from sun effects. Netatmo was recognized with 3 awards from the prestigious CES Innovations Design & Engineering awards in 2013 and 2014.
