Netatmo's security cameras Presence and Welcome add HomeKit support and Siri control

London, 31 August 2017 – Netatmo, a revolutionary smart home company developing groundbreaking, intuitive and beautifully-designed connected consumer electronics, announces the compatibility of its security cameras Presence and Welcome with Apple HomeKit, for more comfort and security at home.

An automatic firmware update will allow Netatmo Security cameras to transition to HomeKit. This applies to all Presence and Welcome cameras, including the ones already purchased.

“Having both our security cameras compatible with Apple HomeKit through a software upgrade demonstrates our ability to constantly provide our existing and new users with the most advanced technologies. All our cameras will benefit from the HomeKit transition, no matter when they were purchased. Netatmo products are long lasting capital goods. Through regular software updates, we ensure they offer the best services to our customers” explains Fred Potter, Founder and CEO of Netatmo.

Presence, the smartest outdoor security camera is able to distinguish people, cars and animals. It tells the user exactly what it sees around their home and notifies them directly on their smartphone. It also has an integrated smart floodlight.

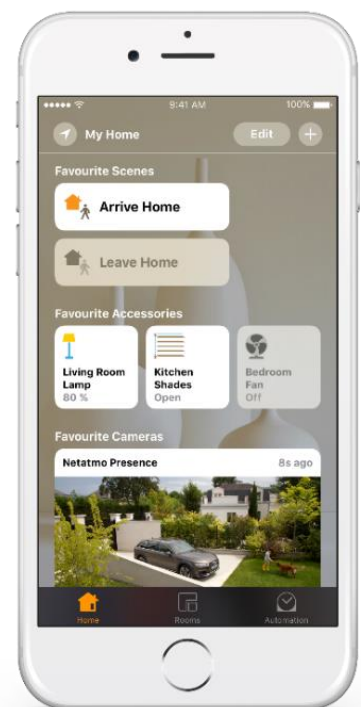

Welcome, the indoor security camera, sends a notification to the user's smartphone saying that an intruder has been detected in their home, complete with a picture of their face and a video of the intruder.

With HomeKit, Presence and Welcome improve comfort and security at home

Apple HomeKit allows users to control smart home devices and make them work together, right from their iPhone, iPad or Apple Watch.

Presence and Welcome users can now ask Siri to show the area they want to monitor (“Hey Siri, show me the entrance”, “Hey Siri, show me the front garden”) to see a live stream from the cameras. They can also activate, deactivate or modify Presence's smart floodlight intensity just by using their voice (“Hey Siri, turn Presence's light on”).

With HomeKit, users can create customised scenarios to connect their Presence and Welcome cameras to other smart home devices. For example, the scenario "Arrive home" switches Presence's smart floodlight on, unlocks the door and activates the heating when users arrive home at night. Users can activate these scenarios with a simple gesture in the Apple Home App, in their smartphone's Control Centre, or by voice using Siri.

From the Apple Home App, users get immediate access to some of their cameras' functions:

- Watch real time live streaming
- Be instantly informed when a motion is recorded, including movements coming from unwanted visitors. Receive a screenshot of the event in real time.
- Rapidly verify if somebody recognised by Welcome is at home.
- Turn on and off Presence's smart floodlight and modify its intensity.

Availability

Presence will be compatible with Apple HomeKit later this autumn. Welcome will be compatible with Apple HomeKit at the end of the year.

This integration adds to the Netatmo Smart Thermostat, the Netatmo Smart Radiator Valves and the Netatmo Healthy Home Coach, all of them already HomeKit-enabled.

About Netatmo

Netatmo is a revolutionary smart home company, developing groundbreaking, intuitive and beautifully-designed connected consumer electronics. Truly smart, Netatmo's innovative products provide a seamless experience that helps users create a safer, healthier and more comfortable home.

Netatmo carefully designs the mechanics, electronics and embedded software of all its products to the highest standards. Netatmo also creates the mobile and web applications that fully realise their potential.

Since 2012 Netatmo has released thirteen devices and accessories, divided into four categories:

- **Weather** - The Personal Weather Station and its accessories, the Additional Module, the Rain Gauge and the Wind Gauge.
- **Energy** - The Smart Thermostat and the Smart Radiator Valves, both designed by Philippe Starck.
- **Security** - The security cameras Welcome, for indoor, and Presence, for outdoor, and their accessories, the Tags and the Indoor Security Siren, and the Smart Smoke Alarm.
- **Air care** - Healthy Home Coach, the smart indoor climate monitor.

Netatmo is a leading innovator in the smart home industry with products available through a growing network of distributors worldwide, selling to consumers through major retail and B2B channels.

Through its program "with Netatmo", Netatmo develops connected solutions with leading brands in the building industry to be integrated into residential home infrastructure, whether new-build or renovation.

In November 2015 Netatmo completed a series B funding round of €30 million. The company previously raised €4.5 million in 2013.
