## About Netatmo

Created in 2011, Netatmo is an innovation company developing consumer electronics for a better and connected lifestyle. Netatmo carefully designs their products' mechanics, electronics and embedded software. Netatmo industrializes them with the finest quality standards and designs the mobile and web applications that unleash their full capabilities. The first device launched by the company, the Netatmo Personal Weather Station, allows one to measure indoor air quality, weather and more. In November 2013, Netatmo launched

their second product, a Thermostat for smartphones designed by Philippe Starck. At the 2014 CES, Netatmo unveiled JUNE, the first bracelet that measures sun exposure and provides recommendations to women on how to protect their skin from sun effects.

Netatmo was recognized with 3 awards from the prestigious CES Innovations Design & Engineering awards in 2013 and 2014.
