Same home, just smarter

Go Green and Reduce Your Energy Bill with Smart Heating Solutions

With energy costs rising and worrying global reports on the use of energy in the home, Brits have a lot to be concerned about. However, Netatmo's smart heating solutions can help.

London, UK - October 23rd, 2018 - A landmark United Nations IPCC report from earlier this month suggested improved end-use domestic energy efficiency would be required in order to meet a recommended 45% global reduction in greenhouse gas emissions within the next 12 years[1].

The report comes at a time when average UK energy bills reached £1,117 in 2017[2]. This year, energy providers have announced more increases to their tariffs, meaning that the average bill is expected to be even higher this year[3].

However, smart heating solutions can help homeowners manage their energy consumption more effectively, without compromising on comfort. These products can simultaneously make a difference to energy bills while contributing to lowering a home's carbon footprint through reduced energy waste.
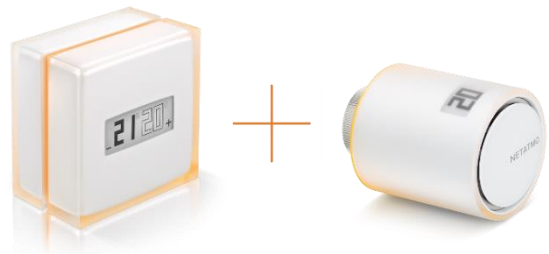

Optimise heating without hiking up energy bills

Several solutions exist to warm homes at a lower cost. Easy to install and program, smart products can control the heating remotely and adjust the temperature according to the time of day through a heating schedule. These smart devices are also able to anticipate the best time to start heating depending on the home's insulation and the outside temperature.

Netatmo's smart heating solutions for individual boilers

Users with individual boilers fuelled by gas, oil or wood or with heat pumps can use a smart thermostat to control the temperature in their homes.

Netatmo's Smart Thermostat is an easy-to-install solution that works with an app. Based on five questions asked in the Energy app, the Thermostat creates a heating schedule according to the habits of the occupants, to heat their house only when necessary. Users can also control their heating from their smartphone. When they go on vacation, they can schedule the date and time of their return to a warm house.

For a room-by-room heating control, **Additional Smart Radiator Valves** can be added to the Smart Thermostat. Compatible with 90% of hot water radiators[4], they regulate the heating on a room-by-room basis. The Additional Smart Radiator Valves create a heating schedule for each room based on a user's daily routine.

For example, the bathroom can be heated to 21°C during the morning, but not for the rest of the day when it is not being used; the parents' bedroom remains at 16°C during the day when it is empty, and the children's room is heated to 19°C from 5PM on weekdays when they come back from school.

Interacting with the Netatmo devices via voice control

Netatmo's smart heating solutions are compatible with leading voice assistants: Apple HomeKit, Google Assistant and Amazon Alexa. Thanks to these compatibilities, users can control their heating by voice. Users just need to start by saying: "Alexa, set the temperature of my Netatmo Thermostat to 20°C", "Ok Google, increase the temperature by 5 degrees" or "Siri, lower the temperature by 3 degrees".

Pricing and availability

Netatmo's Smart Thermostat retails for £149,99 and the Additional Smart Radiator Valves for £69,99. The devices can be purchased on www.netatmo.com, at Amazon UK, John Lewis, CEF, Argos and others.

The Netatmo Energy App is completely free and is compatible with iPhones, from iOS 9 onwards, and Android smartphones from 4.2 onwards. The Netatmo Energy Web App is available on Mac and PC.

About Netatmo

Netatmo is a leading smart home company creating simple, beautiful smart solutions for a safer and more comfortable home. The company's ambition is to bring useful technology to the most intimate place you own. In order to pursue this goal, Netatmo follows four commitments that embody the company's DNA:

- Durable design: no planned obsolescence.
- Privacy at its core: from the conception phase, we ensure that we can guarantee data protection.
- Useful & reliable: our products make your life easier.
- Thoughtful notifications: we notify you only when it is important.

Since 2012, Netatmo has launched thirteen devices and accessories to meet the main demands of the smart home industry. The company offers different solutions to automate the home and make life easier, from its first product in 2012 to today. In addition to its main product range, Netatmo collaborates with key industrial leaders with its "with Netatmo" program to expand its reach and continue to grow strategically with smart integrated solutions that fit in your home's infrastructure. Thanks to this strategy, Netatmo can bring simpler, easier and better home experiences.

Netatmo, same home, just smarter.
