

## Netatmo wins at the European Smart Metering & Smart Grid Awards 2015

London, 30 January 30 2015

Netatmo, an innovation company developing consumer electronics for a better and connected lifestyle, has been named the winner of the **Network and Communication 2015 Award** for its Thermostat for Smartphone at this year's European Smart Metering & Smart Grid Awards held in London during the 6th Smart Energy UK & Europe 2015 conference.

*"We are very proud to have won this award, more particularly as it recognizes excellence in Smart Technology Innovation in the utility sector. We have developed a product that addresses some of the most pressing issues in today's energy sector: energy efficiency and overconsumption. With this award, Netatmo proves it is a major business partner to the construction and HVAC professionals, as well as the energy providers."* says Fred Potter, CEO of Netatmo.

Designed by Philippe Starck, the Thermostat for Smartphone was specifically created for the European market. It sets a programme to reflect the users' habits and allows them to monitor and control their household heating remotely from their mobile phone, tablet or PC. The users benefit from the right temperature at the right time. It provides easy-to-use tools to manage their energy consumption.

Using bespoke app designed to control the Thermostat, consumers can get a direct insight into their energy use in real time and through historical data. Users can better understand how to maximise energy savings and reduce carbon footprint. The Thermostat is compatible with the majority of heating systems, gas, fuel and wood installations as well as heating pumps.

The European Smart Metering & Smart Grid Awards 2015 highlight distinctive achievements in smart energy solutions from emerging and well-established companies in the utility sector. Bringing together over 400 smart energy professionals over a two day conference, the event examines the latest developments & challenges in the smart energy market in Europe today.

Netatmo's Thermostat is available in the UK:

- Through EDF Energy for £199 including installation service as part of its HeatSmart programme
- Online from electronics specialist Maplin, [amazon.co.uk](http://amazon.co.uk) and Netatmo's online store.

### **About Netatmo**

Created in 2011, Netatmo is an innovation company developing consumer electronics for a better and connected lifestyle. Netatmo carefully designs their products' mechanics, electronics and embedded software. Netatmo industrializes them with the finest quality standards and designs the mobile and web applications that unleash their full capabilities.

The first device launched by the company, the Netatmo Weather Station, allows one to measure indoor air quality, weather and more. In November 2013, Netatmo launched their second product, a Thermostat for smartphones designed by Philippe Starck. In the summer of 2014, JUNE was launched, the first wearable tech dedicated to beauty. It helps women to know their UV exposure and protect their skin, a true innovation in anti-ageing beauty routines.

At the CES 2015, Netatmo unveiled WELCOME, the smart home camera that recognizes your loved ones thanks to its face recognition technology.

Netatmo was recognized with 3 awards from the prestigious CES Innovations Design & Engineering awards both in 2013 and 2014, and 4 awards in 2015.
