Netatmo takes another step towards full home protection with its new Smart Carbon Monoxide Alarm

London, UK - 2nd November 2021 – Netatmo, the leading French smart home company for a safer and more comfortable home, announces the availability of its Smart Carbon Monoxide Alarm. The Netatmo Smart Carbon Monoxide Alarm measures carbon monoxide levels in real time in various rooms throughout the home alerting the user when carbon monoxide is detected.

If carbon monoxide is detected, an 85-decibel alarm will alert the user so that they leave their home immediately and call the emergency services.

If the user is not at home, the Netatmo Smart Carbon Monoxide Alarm will also send them a smartphone notification so that they can react quickly and ensure the safety of their loved ones and pets.

The Netatmo Smart Carbon Monoxide Alarm complies with European regulations. It is CE certified (EN 50291) and NF certified - a label only awarded to products that meet the highest safety standards.

According to ONS, Carbon monoxide is the main cause of death by accidental poisoning with 53 cases recorded in the UK in 2019[i]. It's therefore important to take action and protect oneself against this serious risk. In the UK, it is mandatory under the Building Regulations Approved Document J, for England and Wales, to have a carbon monoxide alarm fitted.

32% of accidental carbon monoxide poisoning occurs in the home. Carbon monoxide is an odourless, invisible and non-irritating gas that can be emitted by poorly installed or malfunctioning fuel-burning appliances that should be checked every year, such as fireplaces, gas cookers and boilers.

To avoid the risk of poisoning in the home, especially if it has fuel-burning appliances (likely sources of carbon monoxide), installing an operational carbon monoxide alarm is advisable.

A 10-year battery

It's recommended that all carbon monoxide alarms are replaced after 10 years because the detection sensor wears out over time. Many connected carbon monoxide alarms have batteries that last only 1 to 5 years, meaning the user would have to change them regularly.

Thanks to its long-life battery, the Netatmo Smart Carbon Monoxide Alarm will last for 10 years, without the user having to worry about it. At the end of its lifetime, it sends the user a notification to warn and prompt them to buy a new carbon monoxide alarm for full protection.

Automatic tests

The Netatmo Smart Carbon Monoxide Alarm has an Auto-Test feature that monitors the carbon monoxide sensor, battery and Wi-Fi connection. The Alarm will alert you if it detects any problems ensuring peace of mind. It also has an Alarm Test feature that checks if the 85-decibel alarm is working properly, and it's recommended to be checked at least once a year.

Quick and easy installation

The Netatmo Smart Carbon Monoxide Alarm works without any electrical connection and can be installed quickly. Simply screw it to the wall, following Netatmo's installation guidelines that are provided in the pack, and download the Netatmo Home + Security app.

It's recommended to install a carbon monoxide alarm in every room that has a fuel-burning appliance like a boiler, fireplace, gas cooker or stove.

Price and availability

The Netatmo Smart Carbon Monoxide Alarm is available for £89.99, with no hidden fees or additional hub required. The product is available on www.netatmo.com, Apple, Amazon, BOX, BT Shop, Buy It Direct - Appliance Direct & Laptops Direct, Comet, Currys PC World, Ebuyer, Le Redoute UK, Maplin, Office Outlet, Robert Dyas, STUDIO and Very

The Netatmo Home + Security app is free and compatible with iPhones and iPads from iOS 14 and Android smartphones and tablets from 5.0.

The Netatmo Webapp is available on Mac and PC.

About Netatmo

Netatmo is the leading smart home company creating simple and smart products for a safer, more comfortable home.

Since its launch in 2012, Netatmo has always followed 4 principles when designing a product:

- Durable design: No planned obsolescence.
- Privacy at its core: From the design phase, we ensure our users' data is protected.
- Useful and reliable products: Our products make life easier.
- Thoughtful notifications: We only notify you when it's important.

To date, Netatmo has launched 13 smart home devices and accessories. Helpful and simple to use, these products make everyone's day-to-day life easier while improving well-being at home.

In addition to its consumer product lines, Netatmo collaborates with key industrial leaders through its "with Netatmo" program to develop smart solutions that integrate into the home's infrastructure. Thanks to this strategy, Netatmo can expand its reach and provide a better, simple and accessible smart home experience.

In November 2018, Netatmo joined the Legrand Group, a global specialist in electrical and digital building infrastructures.

Netatmo, same home, just smarter.
