NETATMO INTRODUCES ITS NEW APP FOR THE WEATHER STATION FOR SMARTPHONE

Paris – 10th November 2015. Netatmo, an innovative company developing consumer electronics for a better and connected lifestyle, announces today the availability of the new version of its Weather Station for Smartphone's App.

The App now presents a fully renewed interface, with a modern and pure design. Its colours and themes adapt in real time depending on the moment of the day and the cloud cover.

The App includes an intuitive display of all the information gathered by the Weather Station and its accessories. It features a direct access to the WeatherMap - the world's largest weather observation network, displaying the data recorded by the Netatmo Weather Stations made public by their users all around the world.

This new App also benefits from the full potential on large smartphone screens, such as iPhone 6S or Samsung Galaxy S6 Edge.

iOS users will be able to download the new App from today. Android and Windows Phone versions will be available from Friday the 13th of November.

The Netatmo Weather Station offers a complete solution to observe the weather conditions. It monitors indoor and outdoor environmental elements, including temperature, humidity, air pressure, CO2 level and noise pollution. The information provided by the Weather Station pairs to users' smartphones and empowers them to improve their indoor wellness and adapt their outdoor activities.

About Netatmo

Founded in 2011, Netatmo is an innovative company developing consumer electronics for a better and connected lifestyle. Netatmo carefully designs their products' mechanics, electronics and embedded software. Netatmo industrializes them with the finest quality standards and designs the mobile and web applications that unleash their capabilities. The first device launched by the company, the Weather Station for Smartphone, allows owners to measure indoor air quality, weather and more. In November 2013, Netatmo launched their second product for the European market, the Thermostat for Smartphone designed by Starck. At CES 2015, Netatmo unveiled Welcome, the smart home camera featuring revolutionary face recognition technology.

Netatmo was recognized with 3 awards from the prestigious CES Innovations Design & Engineering awards both in 2013 and 2014, and 4 awards in 2015.
