

Netatmo and Henkel Bring Data-Driven Sustainability to their Factories to help save energy

London, 4th of October 2018 – Today, the smart home company Netatmo and the leading manufacturer Henkel show that smart home technology can be easily integrated into manufacturing environments to drive sustainability throughout the value chain.

Henkel uses Netatmo's Smart Home Weather Stations in all of its 31 Laundry & Home Care factories to understand the impact weather has on energy and utility consumption in order to reduce their environmental footprint. "We see potential to reduce our global energy consumption by 3 to 5 percent until 2020, when fully leveraging these insights and integrate them into our processes", said Johannes Holtbrügge, Senior Management Digital Transformation at Henkel.

For example, at its production in Düsseldorf, Henkel increased the burner efficiency of its spray tower for producing power detergents by five percent. Additionally, the company optimised the process for the gas burner for the tower and the temperature control along the entire drying process.

Fred Potter, CEO of Netatmo added: "This shows yet another way our products can help communities beyond home customers. In this case, our sensors can help Henkel achieve its commitment to sustainability."

How does it work?

The Smart Home Weather Station consists of two components: an indoor and an outdoor module. Henkel uses the smart device to analyse the outside temperature, humidity and relative air pressure at the company's production sites and correlate the data with energy consumption. The stations connect with Henkel's monitoring system through the Netatmo API (app programmable interface) to retrieve, process and analyse the data against other factors inside the factories.

The purpose is to give Henkel data to understand the impact weather has on energy and utility consumption. As a result, limited natural resources such as gas and water can be used in a more efficient and sustainable way. Thanks to the various Smart Home Weather Stations, Henkel can manage less waste and energy consumption overall.

About Netatmo

Netatmo is a leading smart home company creating simple, beautiful smart solutions for a safer and more comfortable home. The company's ambition is to bring useful technology, to the most intimate place you own. In order to pursue this goal, Netatmo follows four commitments that embody the company's DNA:

- Durable design: no planned obsolescence.
- Privacy at its core: from the conception phase, we ensure that we can guarantee data protection.
- Useful & reliable: our products make your life easier.
- Thoughtful notifications: we notify you only when it is important.

Since 2012, Netatmo has launched thirteen devices and accessories to meet the main demands of the smart home industry. The company offers different solutions to automate the home and make life easier, from its first product in 2012 to today. In addition to its main product range, Netatmo collaborates with key industrial leaders with its "with Netatmo" program to expand its reach and continue to grow strategically with smart integrated solutions that fit in your home's infrastructure. Thanks to this strategy, Netatmo can bring simpler, easier and better home experiences.

About Henkel

Henkel operates globally with a well-balanced and diversified portfolio. The company holds leading positions with its three business units in both industrial and consumer businesses thanks to strong brands, innovations and technologies. Henkel Adhesive Technologies is the global leader in the adhesives market – across all industry segments worldwide. In its Laundry & Home Care and Beauty Care businesses, Henkel holds leading positions in many markets and categories around the world. Founded in 1876, Henkel looks back on more than 140 years of success. In 2017, Henkel reported sales of 20 billion euros and adjusted operating profit of around 3.5 billion euros. Combined sales of the respective top brands of the three business units – Loctite, Schwarzkopf and Persil – amounted to 6.4 billion euros. Henkel employs more than 53,000 people globally – a passionate and highly diverse team, united by a strong company culture, a common purpose to create sustainable value, and shared values. As a recognized leader in sustainability, Henkel holds top positions in many international indices and rankings. Henkel's preferred shares are listed in the German stock index DAX.
